

Harold J. Phillips, MRP- Deputy director of programs, NMAC

Session title

Quality of life measures for people living with HIV over 50

AIDS 2024

The National HIV/AIDS Strategy (NHAS)

- NHAS aims to end the HIV epidemic in the US by 2030.
- Key goals include reducing new HIV infections and improving health outcomes for people living with HIV.
- Focus on social determinants of health for better outcomes and quality of life for people living with HIV.

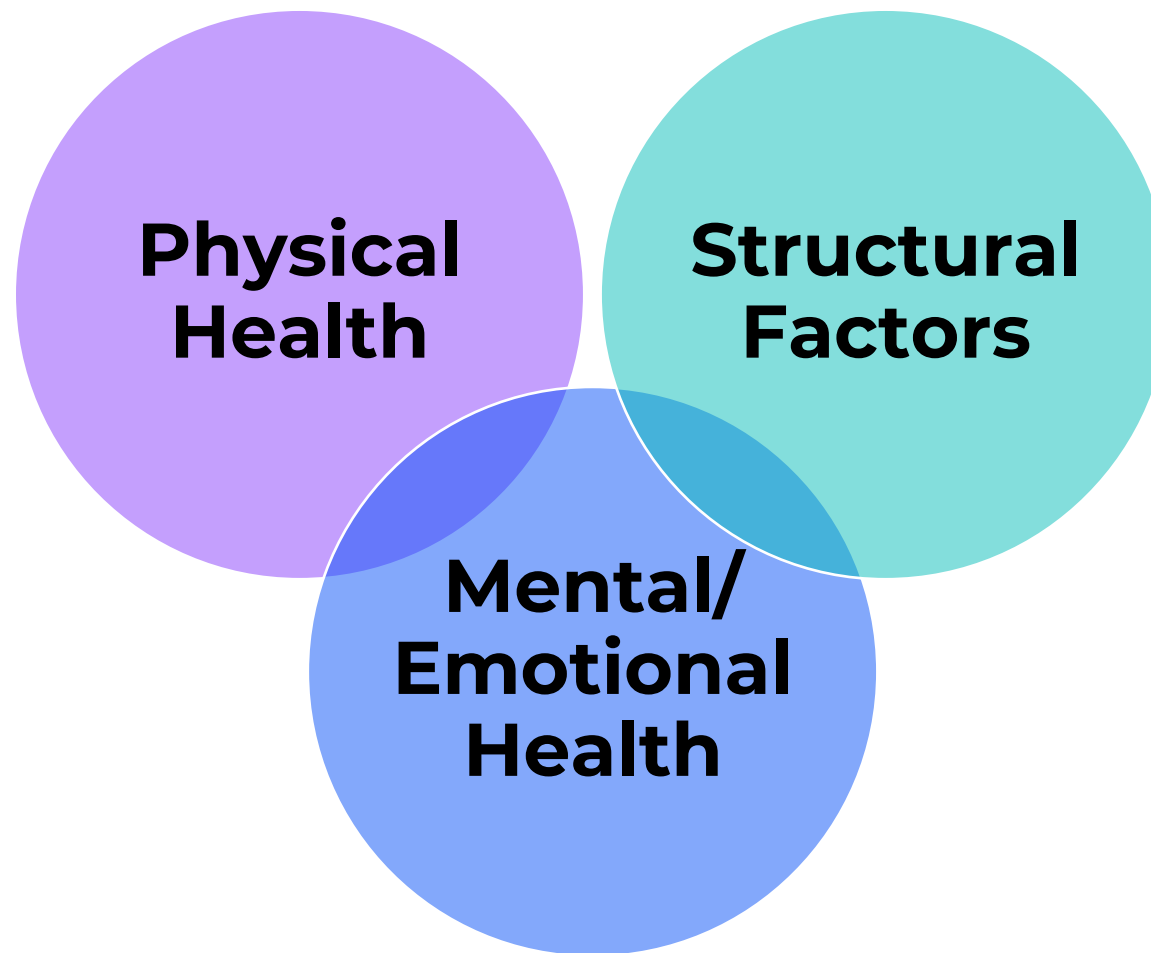

AIDS 2024

Quality of Life Indicators

- NHAS includes quality of life measures to track progress towards its goals.
- These measures encompass physical, mental, and emotional health, as well as social determinants of health.
- An additional indicator focuses on HIV stigma.

- + Stigma indicator:**
A multidimensional measure of HIV stigma among people living with HIV.

Quality of Life Indicators

Among people living with HIV:

- #7** - Decrease stigma by 50% from a 2018 baseline score of 31.2.

- #9** - Increase the proportion reporting good health to 95% from a 2018 baseline of 71.5%.

- #10** - Decrease the unmet need for mental health services by 50% from a 2017 baseline of 24.2%.

- #11** - Decrease the proportion experiencing hunger due to lack of money by 50% from a 2017 baseline of 21.1%.

- #12** - Decrease the proportion who are unemployed by 50% from a 2017 baseline of 14.9%.

- #13** - Decrease the proportion who are unstably housed or homeless by 50% from a 2018 baseline of 21.0%.

Community Involvement

How can we use this indicators to improve the lives of people living with HIV who are 50+?
